

Team Meetings

Date: March 18th, 2022

Attendees: Carson, Ryan, Chester, Garry

Absent: N/A

1. Project

Progress

Ryan's Tasks

- Removed votes component from Session and agenda pages and added Votes Modal to Sidebar
- Fixed darkmode issue on agenda page
- Made small UI fixes to Dashboard Sidebar

Carson's Tasks

- Installed Socket.io in the project.
- Switched authentication from context-based to use React-Redux.
- Setup role-based authentication.

Chester's Tasks

- Worked on weekly minutes report.
- Updated NavBar and sidebar for improved clarity and visibility.
- Fixed issues related to registered users from week 21.

Garry's Tasks

- Added description modal to session page
- Removed comments on logged-in and registered users pages
- Re-worked interactions modal

Blockers + Surprises

- No blockers or surprises this week

2. Plan**Tasks for this week:**

- This week we focused on implementing changes/fixes that were suggested to us from our peer testing sessions as well as implementing React-Redux and setting up role-based authentication

Goals for the next milestone:

- Meeting with the client on Friday, March 18th to see what's next
