AGMeeting

Meeting called by:	AGMeeting	**Type of meeting:**	Client Meeting
Facilitator:	Ife	**Note taker:**	Chester Ng
Timekeeper:	Chester Ng		

Attendees: Team 1, Team 2, Team 3, Ife

Minutes

Agenda item: Database Structure   **Presenter:** All Teams

Discussion:

The client has chosen to go in a different direction with how the database will be structured now and the current implementation will have to be redone. They'd like us to review the current ER design according to the new needs and requirements. All teams were asked to present what they have done so far in terms with their implementations of Sequelize as well as the ER diagrams. Ife would like to confirm the database schemas we have so far. Main thing is to focus on authentication and prioritizing getting roles correct when users log in. After this is finalized, the next step is to work on Socket.io and implementing login and registration.

Conclusions:

Update database schema with new information.

Action items	Person responsible	Deadline
✓ Send Ife our current database schema	Chester	2/4/2022
✓ Update existing database schema	Team	2/11/2022
